Professional Experience

Reporter | Decrypt | November 2024 – June 2026

- Covered SEC, CFTC, congressional, and federal court developments affecting crypto policy, enforcement, staking, token classification, stablecoins, AML rules, and market structure legislation.
- Reported on cryptographic privacy, protocol security, mixer forfeitures, privacy coin governance, prosecutions of protocol developers, exchange breaches, and state-linked threat activity.
- Analyzed AI policy, export controls, researcher mobility restrictions, CBDC design, stablecoin supervision, central banks, and APAC digital asset regulation.
- Produced breaking news, regulatory analysis, and explanatory features connecting crypto, AI, privacy, and security developments to broader technology policy.

Editor | Crypto Briefing | December 2023 – October 2024

- Edited high-volume crypto industry coverage for accuracy, clarity, sourcing, structure, house style, and publication readiness.
- Produced a weekly newsletter on crypto markets, macroeconomics, regulation, AI, market structure, and ecosystem trends.
- Set editorial priorities across policy, regulation, market structure, and technology coverage while coordinating with writers and contributors.

Editor | Crypto Daily | February 2021 – December 2023

- Edited crypto, Web3, privacy, security, regulation, and market news for accuracy, clarity, consistency, structure, disclosure, tone, and reader relevance.
- Directed coverage priorities, managed contributor copy, enforced sourcing standards, and maintained editorial quality across daily publishing workflows.

User Experience and Content Designer | BlockchainSpace | Q3 2022

- Wrote product, marketing, and communications copy for a Web3 gaming guild infrastructure platform.
- Produced guild profile features, video scripts, platform information architecture, and content materials for product and marketing teams.

User Experience Writer | GoTyme Bank | Q3 2021

- Wrote UX copy for a neobank mobile app, including onboarding, account setup, transaction confirmations, error states, and in-app help content.
- Created customer-facing product messaging aligned with digital banking flows, usability requirements, and brand voice.

Senior Public Relations Writer | i55 Talent House | June 2018 – February 2020

- Wrote executive bylines, thought leadership articles, media statements, financial PR copy, and corporate communications for banking, fintech, education, publishing, and technology clients.
- Developed messaging for digital banking, mobile banking, open finance, branch digitization, customer onboarding, enterprise connectivity, and digital learning initiatives.

Public Relations Writer | Philippine Integrated Advertising Agency | June – November 2019

- Produced public relations and corporate communications for a financial conglomerate, including brand positioning, communications strategy, executive profiles, interview briefings, and crisis communications materials.

Reporter | CoinGeek | December 2017 – February 2018

- Reported on early crypto industry developments, protocol security, cryptojacking, exchange thefts, fraud, enforcement actions, and blockchain-related cyber risk.
- Covered vulnerabilities and enforcement matters including Meltdown and Spectre, Monero mining malware, South Korean exchange theft attribution, BitConnect litigation, and BitFunder fraud charges.

User Experience Writer | ImFree | November 2015 – February 2016

- Wrote mobile app microcopy for a Fortune 500 client, including onboarding flows, form labels, error states, empty states, push notifications, in-app help text, copy decks, voice rules, and content review passes.
